

Nucor Steel Jackson, Inc.

Environmental Policy

Nucor recognizes that it has an important role within the community as a leader of environmental stewardship. Nucor has committed the resources necessary to establish a documented Environmental Management System that will drive our environmental improvement while possibly reducing potential impacts to climate change. While working to improve our efforts, we will communicate to our teammates, persons working on our behalf, and members of our community our “RIVER” policy.

Resources — Nucor is conscious of our natural resource consumption and will manage these resources in an efficient manner.

Improvement — Nucor is committed to continually improving our environmental performance. This is facilitated by developing, monitoring, and measuring objectives and targets within our Environmental Management System.

Value — The EMS will add value to our Company by ensuring compliance with all applicable environmental requirements. This minimum expectation is essential to Nucor and essential for the trust of our stakeholders.

Employees — All employees (teammates) will work together to prevent pollution and protect the environment by reducing the environmental impacts within the different aspects of their jobs.

Responsibility — It is each teammate’s personal responsibility to help with our efforts to be the leader of environmental performance and sustainability in our industry.

Nucor Steel Jackson, Inc. EMS Scope Statement

The scope of the Nucor Steel Jackson's EMS includes the following processes which are located on the Nucor site. Nucor Site is defined as property and employees of Nucor Steel Jackson, Inc. and specifically includes General Recycling of Mississippi, and Nucor Steel Central Warehouse located at 2000 Underwood Drive.

- Receiving, radiation detection, processing, handling and management of all scrap activities including General Recycling, Nucor Steel Jackson and TMS operations.
- All activities associated with the melting, casting, rolling, storing and shipping of steel.
- Slag, Scale and Scrap management and processing, which is performed on our site by TMS.
- All activities associated with the handling, management and shipment of wastes.
